Coming to the interface, if there is any tool that comes with the modern interface yet maintains simplicity is Recoverit, beyond any shadow of a doubt. One of the most interesting benefits available with Recoverit is that it can let you preview your scanned files prior to lost partition data recovery or any other data recovery. It has also the capability to dig deeper than imagined and as a result, it gives back the files that were removed long ago.

**Let us put some light on its features that make it unique and desirable solution from others:**

- Recoverit is able to handle different data loss scenarios. One can easily [recover deleted partition](#), hidden partition data, improperly resized data etc.
- The users are privileged as they get to recover lost or damaged FAT, NTFS, HFS, HFS+, HFSX, Ext2, Ext3 partition.
- It maintains equality with Windows and Mac operating systems and performs perfectly for lost partition recovery.
- It works and scans the lost data in exceptional speed.
- There is no harm to the data in any way and one can be free from the worries of virus attacks and infections while installing and working with Recoverit as it promises 100% guarantee.
- The users get 7 days money back promise too.
- With a highly advanced technology, exercising recovery of other data types like deleted data from camera, iPod, SD card etc. is no longer a big deal for Recoverit.
- It also offers free updates upon subscribing for one year.

The software is quite affordable when it comes to purchasing. Honestly, it depends on the users' needs. For "Professional" version, a user needs to pay \$39.95 for one year subscription where he/she gets the facilities of recovering all data types, recover from any storage media and deep scan mode. To recover formatted partition using "Ultimate" version, one has to submit \$59.95 and this provides a plenty of more functionalities as compared to the former version. The third is "Technician" version that is a quite expensive – \$299.95 to be precise, but offers to work with 500 PCs per year. One gets professional technical support with this version too.

All things considered, one should look no further than Recoverit when

recovering lost partition in Windows 10 is the concern.
