

# Remo Software Launches Remo Repair AVI – Corrupt AVI File Repair Tool

MOUNTAIN VIEW, Calif., Aug. 13, 2012 (SEND2PRESS NEWSWIRE) – Remo Software has announced the launch of Remo Repair AVI, a newly designed tool for repairing unplayable avi, xvid and divx file formats. This launch comes as another major breakthrough for the company, which has established its credentials as a trusted and reliable software company.

AVI files become unplayable because of corruption. While severe file corruption can render the file completely unplayable, minor corruption can lead to teething problems, like sound but no picture or vice versa; picture freeze while sound play continues, pixilated images, audio video sync problems and lots more. These problems might be due to codec issue, corrupted frames or bad AVI index. Identifying and addressing these issues is where the challenge lies. Not all tools can diagnose the malady accurately. Remo has come out with an infallible application to set such files right and [repair avi files](#).

“Disoriented movie files leave one frustrated and helpless,” said Omer Faiyaz, the CEO of Remo Software. “We have developed an application which can effectively fix corrupt movie files and make them reusable. Playing downloaded video files smoothly has always been a problem, but now, with this new application, we have removed all hassles associated with such viewing.”

Remo Repair AVI has been designed to carry out a fast analysis of the corrupted file. It first identifies the basic error, and then leads the detection up to other underlying errors in the audio/video stream. This is followed by fixing the audio/video error alongside, and seamlessly integrating the two to restore smooth viewing. The USP of this application lies in its demo version which fixes the file and shows the user the complete repaired file. So, a user can feel assured before shelling out money on the product.

This new application is available for Windows and Mac users. Remo Repair AVI is available at official Remo Software Website. For more information, please visit <http://www.remosoftware.com/> .
