Novel Resistance System

Total core exercises including ab crunches and low back range of motion and strengthening are offered with unlimited incrementally adjustable resistance.

Perform biceps, triceps, lats, deltoids, quadriceps, hamstrings, adductors, abductors, and glutes exercises with SitFit Chair™. The SitFit Chair has hand grips at waist level and lower leg level. Grab the hand grips and get to work.

Smooth Hinges

SitFit Chair™ allows you to perform many different core and extremity exercises as well as multiple upright and reclining chair settings thanks to five pairs of specially designed hinges.

The hinges serve as the “engine” of the chair. The smoothness of hinge function is associated with the incorporation of a novel spring release mechanism.

Hand and Foot Support

SitFit Chair™ features elevated lower leg and foot support so you can sit back and kick your feet up. The chair is orthopedically designed so the foot is elevated higher than the knee, and the knee is elevated higher than the hip.

Ultimate Portability

SitFit Chair™ is extremely portable thanks to its foldable center. This personal gym folds neatly and is transportable for use outside of the home, in the yard, at the beach or pool, camping, at sporting events, and more. For added convenience, SitFit Chair™ is made to be carried as a backpack or on your shoulder.
