

Samsung Galaxy S8 Goes on Sale and TunesGo Becomes the Must-Have S8 Manager including Full Compatibility with Android 7.0

HONG KONG, April 27, 2017 (SEND2PRESS NEWSWIRE) – Samsung Galaxy S8 and S8+ went on sale worldwide on April 21 and pre-orders are happening on a massive scale, says Wondershare, the maker of TunesGo, an ideal one-stop solution to manage your handset device. Samsung has managed to impress the android fans by releasing the specs of S8 in advance.

Send2Press® Newswire

The phone is truly a marvel designed beautifully one of the stunning phones ever released. A recent report shows that pre-orders of S8 has crossed the 1 million units mark in just 11 days.

This is the highest ever pre-orders for a new smartphone. After the scandal of Note 7, the success of S8 is crucial for Samsung. The recent Pre-Orders data suggests that Samsung S8 will be a huge Success for Samsung and this will give them a rebound from the note 7 disaster. The Android Geeks are surely excited about this one and can't wait to get their hands on S8.

With the advancement in Mobile technology, mobile phone management solution becomes more and more essential. Mobile phone users always try to find a

solution to manage phone data. Many people do not shift to newer devices because of the hassle they have to go through when they transfer data from old device to a newer one. There are many tools available to perform these operations. TunesGo is one of the top lists which could work as the best phone manager for both iOS & Android.

If you are an S8 user, then you must have Wondershare Tunes Go software. Wondershare Tunes Go is an ideal one stop solution to manage your handset device. TunesGo is fully compatible with iOS 10.3 and Android 7.0. Only a few Android managers could support Android 7.0 so far. It could help users to transfer photos, music, contacts, SMS, App data and videos to from Android to PC and vice versa. Phone to phone transfer also becomes a simple operation with TunesGo. Backup and restore operations are basic with TunesGo. TunesGo also provides rooting options for most Android devices. Also, with file explorer function, users could have access to the phone's storage and use S8 as a flash drive.

For those multiple-device users, TunesGo is also the best choice since it can be used to manage Android and iPhone at the same time. Beebom has rated it as one of the best iTunes alternative on the market since its iOS management is powerful.

TunesGo is one management software produced by Wondershare. As a prestigious software company, Wondershare has been specialized in the mobile management for decades. It has obtained 5 million users all around the world due to its quick updates for the latest devices and new technology. Whenever a new device comes out, Wondershare is always one of the first companies that catch up the new trends and create updated solutions. This is the reason why Wondershare have gained the trust of their loyal customers which keep on increasing every day.
