

# ShortSave, Inc. Distressed Mortgage Work Out Solution Wins 2014 Servicing Trailblazer Award

MONUMENT, Colo., Nov. 25, 2014 (SEND2PRESS NEWSWIRE) – ShortSave, Inc. ([www.Short-Save.com](http://www.Short-Save.com)), a mortgage industry technology innovator that helps distressed borrowers work out their loans with their lenders in a matter of days, was awarded the coveted Servicing Trailblazer Award at the 15th Annual Mortgage Technology Awards Ceremony on October 19 in Las Vegas.

The Servicing Trailblazer Award acknowledges a servicer or vendor initiative, product or platform that uses technology to optimize mortgage portfolio management and ensures efficient communication.

ShortSave won against several more established companies because it upends the traditional non-performing loan servicing market. The company's unique and patent-pending software uses data the lender already has to make near-instant decisions about whether a distressed borrower is eligible for a short sale, loan modification or deed in lieu offer.

"We're thrilled about receiving this prestigious award and the national recognition that it creates," says Karl Falk, ShortSave, Inc. co-founder and CEO. "We built ShortSave to allow the borrower to communicate and collaborate with their lender – so everyone wins."

ShortSave eliminates weeks of worry and indecision, and has the potential to help millions of homeowners – and lenders, who are just as motivated to get non-performing loans off their books as borrowers are to resolve their mortgage troubles.

"With new CFPB guidelines for pre-foreclosure workouts, the old way of doing business will eventually become ancient history," Falk said. "This award is a testament to the lenders and funds that believed that ShortSave is honestly a better way to do business."

Since 2000, the Mortgage Technology Awards have been honoring industry innovators. Awards are given in 12 categories. Members of the National Mortgage News and Mortgage Technology editorial staff select winners for each category. Winners are featured in the Fall 2014 issue of Mortgage Technology available online at
