

Steven Berger to Speak at Healthcare Business Analytics Best Practice Summit

LIBERTYVILLE, Ill., April 28, 2015 (SEND2PRESS NEWSWIRE) – Steven Berger, chairman of Healthcare Insights, LLC, and a nationally known hospital financial management expert, will be a featured speaker at the Healthcare Business Analytics Best Practice Summit in Chicago on May 5, 2015. The summit, taking place at the Sheraton Hotel and Towers, is presented by the Chicago Healthcare Business Intelligence Alliance (CHBIA), a member-led business roundtable exclusively for senior executives from the healthcare industry.

During the meeting, Berger will lead a breakout session on best practices for developing an effective hospital business intelligence strategy in a value-based healthcare environment.

“Hospitals are complex-overly complex-places to manage,” said Berger, “and constant changes in how healthcare is delivered and paid for only serve to increase the complexity. Hospital leaders armed with the tools, data, and analytics needed to more accurately capture and control the costs of delivering care are in a much better position to significantly improve both financial and clinical outcomes.”

Berger is one of the founders of Healthcare Insights (HCI), a Best in KLAS #1 Category Leader for four years in a row and a premier provider of healthcare decision support software for financial management, costing, and clinical analytics. Since merging in October 2014 with NOMISe, Inc., the company has expanded its offerings to include cost accounting consulting and outsourced costing services specifically for hospitals and health systems.

Prior to founding HCI, Berger was a hospital auditor and hospital/health system finance officer at organizations in New York, New Jersey, Missouri, and Illinois. He is a widely recognized course designer and instructor, as well as a successful author and industry thought leader.

The one-day CHBIA summit will bring together healthcare experts and executives from throughout the Midwest to share and learn best practices and discuss what payers and providers are doing in healthcare analytics to gain significant improvements in cost, quality, and patient outcomes.
