

Synergy Resources Partners with Diverse Technology Solutions to Bring Manufacturing ERP Solutions to The Cloud

ISLIP TERRACE, N.Y., Jan. 20, 2016 (SEND2PRESS NEWSWIRE) – Synergy Resources, the largest Value Added Reseller and service provider of Infor’s VISUAL ERP software has announced a partnership with [Diverse Technology Solutions](#) (DTS), a leading provider of cloud hosting and technology consulting services.

[Synergy Resources](#) has certified DTS as their exclusive cloud hosting provider licensed to run VISUAL ERP manufacturing software “in the cloud.” Infor VISUAL ERP is designed for Engineer to Order, custom, make to order, configure and assemble to order, as well as make to stock manufacturing companies. Its unique capabilities improve the business performance of manufacturing companies by providing greater visibility into costs of manufacturing, scheduling and on-time delivery, and areas to improve the quality of the manufacturing materials and processes.

The partnership between Synergy and DTS enables access to the VISUAL ERP software through the cloud. This will allow manufacturing companies to achieve a lower cost of IT ownership, by offloading hardware infrastructure maintenance. The product will be sold directly by Synergy Resources under the name “Synergy Cloud” powered by Diverse Technology Solutions. As a part of both organizations dedication to helping businesses leverage technology to accomplish their goals, Synergy Cloud will grant an opportunity to improve productivity by having access to VISUAL ERP from any device, anytime, anywhere.

Clayton Hart, Managing Partner of Diverse Technology Solutions, stated “We are excited to launch this new venture with Synergy Resources. We worked diligently to customize our partner program to meet Synergy’s goals and all their requirements to develop this new product and cloud strategy with their management team.”

Mark Lilly, Partner and Director of Sales & Marketing of Synergy Resources stated, “We are very excited to be able to provide a complete infrastructure solution along with our current software offerings to our clients. This gives our clients the option to run their VISUAL software along with back office Microsoft tools in the cloud.”

Gene Caiola, Partner and Director of Services of Synergy Resources stated, “This is very different from using just any hosting platform. Synergy knows VISUAL, so we are adding value by performing certain IT tasks such as updates and backups to Microsoft tools and VISUAL for our clients. This allows them to refocus internal IT resources to tasks or projects that have a much bigger return: Business performance metrics and reporting, for example.”

About DTS:

Founded in 1998 by a team of leading industry IT networking engineers Diverse Technology Solutions has become a leading provider of Virtual Desktop and cloud computing services. As a Tier III SOC2 and SOC3 compliant provider, Diverse Technology Solutions operates out of one of the largest data centers of its kind in North America providing cloud hosting services to customers both in the U.S. and abroad.

About Synergy Resources:
