

TeamF1 to Demonstrate Advanced Internet Gateway and Cloud Device Management Solutions at Computex 2013

FREMONT, Calif., June 3, 2013 (SEND2PRESS NEWSWIRE) – COMPUTEX 2013 – TeamF1, Inc. (www.TeamF1.com), the leader in embedded networking and security software solutions for wired and wireless applications, today announced that it will demonstrate new advances in its SecureFirst CPE Gateway Solution (CGS) on several system-on-chip (SoC) platforms, and a new, powerful Cloud Device Management Solution (CDMS) from June 3 to June 7 during the Computex Taipei trade-show, the world's second largest international computer and electronics exhibition.

TeamF1's SecureFirst line of "customizable standard products" offer highly secure and optimized embedded networking software solutions suitable for business and residential grade intelligent gateways and access points. The company is showcasing new features in its popular line of turnkey production-ready software that includes the SecureFirst Security Gateway Solution (SGS) and CPE Gateway Solution (CGS). These solutions are being demonstrated on the latest System-on-Chip (SoC) chipsets from TeamF1's leading technology partners including Cavium Networks, Marvell Technology Group, Open-Silicon and others.

TeamF1 is also unveiling its SecureFirst Cloud Device Management Solution (CDMS) which opens up the use of the latest cloud technologies for small business IT departments and value-added resellers (VARs) to securely manage routers, wireless access points and other network devices enabled with TeamF1 software. CDMS combines a very efficient and responsive device-side cloud adapter with a flexible, server-based management plane that runs on most common cloud frameworks and uses the latest in federated authentication schemes and cloud storage technologies to make management of multiple network devices as seamless as possible.

"Computex gives us an excellent opportunity to share our groundbreaking features with our customers and partners from around the world," said Deepak Kulkarni, Vice President of International Sales and Business Development at TeamF1. "It gives them an opportunity to see first-hand how our technology can improve their top and bottom lines, by enabling them to offer products that are ahead of the curve."

"We are excited to showcase the latest cloud-based innovations made in our field-proven device software solutions already being deployed by leading OEMs world-wide," said Prasanna Kondapaneni, TeamF1 Vice-President of Advanced Technologies. "Our SecureFirst Cloud Device Management Solution enables easier and more powerful management, control and monitoring of networked devices, while reducing the local processor and memory resources on the device."

More details on SecureFirst CDMS are available to select, qualified customers upon request.

TeamF1 will be exhibiting their products in their demo suite at Taiwan International Convention Center (TICC) "Cozy Corner" Meeting Room (1st Floor) from June 3 – June 7 at 1 Hsin-Yi Road, Section 5., Taipei, Taiwan. The TeamF1 team will be available for presenting the latest technologies advances in its product portfolio. Appointments for meetings can be made by contacting us at +886 (933) 760-292 and by filling out a contact form at: <http://TeamF1.com/home/computex-contact-form>.

About TeamF1:

TeamF1, Inc. a privately held corporation headquartered in Fremont, California, is a leader in high performance embedded networking and security software. TeamF1's products enable secure networking of telecom/datacom and industrial equipment. For more information visit <http://www.TeamF1.com/> or contact TeamF1 Public Relations at 510-505-9931.
