

# Tenorshare UltData Supports iOS 10.3 Very Well!

NEW YORK, N.Y., April 3, 2017 (SEND2PRESS NEWSWIRE) – Apple recently announced its iOS 10.3 release and it looks like really awesome with big features we have never heard of. However, issues always come along with changes. Breaking: [Tenorshare UltData](#) has been improved to support iOS 10.3 and iTunes 12.6. Today, we will take a close look at this amazing data recovery and iOS repair tool.

Send2Press® Newswire

It's believed that the biggest feature of new iOS should be the APFS (Apple File System) files and it has replaced the previous 27-year-old HFS and HFS + files. To meet with this innovative change, Tenorshare dedicates to develop and improve its UltData into a higher level to better support iOS 10.3 system.

As an all-in-one program, UltData can help recover lost data after iOS 10.3 update including messages, contacts, photos, whatsapp data, etc on iPhone/iPad/iPod. Also, it supports effectively repair iOS 10.3 update issues like stuck in verifying update, install errors, etc.

## Highlighted features of Tenorshare UltData:

1. High support of latest iOS 10.3.
2. Retrieve iPhone data lost due to upgrade failure to iOS 10.3, jailbreak or

- factory setting restore;
3. Restore iOS data back to the newly-updated iDevices when iTunes got crashed during upgrade;
  4. Get back iPhone data when your device was stuck in recovery mode;
  5. Save lost data from damaged, crashed, broken or smashed iPhone;
  6. Three recovery modes supported: Recover data from iOS device directly or restore files from iTunes backup file or iCloud backup if you have backed up your data before iOS 10.3 update;
  7. 12 types of iPhone files supported, such as contact, call history, text message, note, photo, video, recording, etc.;
