

Tenorshare Updates iPhone Data Recovery with iOS 8, iPhone 6 and 6 Plus supported

NEW YORK, N.Y., Sept. 18, 2014 (SEND2PRESS NEWSWIRE) – Tenorshare has updated iPhone Data Recovery to V6.0.0.0, the superstar iOS 8 photo recovery software, featuring an all-new user interface and revolutionary new technologies that make it possible to recover data from all iOS 8 devices on Windows or Mac.

The new version of iPhone Data Recovery introduces two more file types. Besides recovering contacts, call history, photos, videos, messages, etc. from iPhone series. The version 6.0.0.0 enables you to restore Viber call history and Viber messages as well.

“Tenorshare iPhone Data Recovery is the number one iOS file recovery software in the world,” said Mike Lee, Tenorshare’s CEO. “The pioneering technology and personalized UI design make it loved by all Apple fans. We will continuously try our best to make it better.”

The new version is available in Tenorshare’s official website already. Customers can download it there directly.

Key features added in Version 6.0.0.0:

1. Version is compatible quite well with iOS 8. Apple’s iOS 8 comes with new messages and photos features. The new version can recover photos from all iOS 8 installed iPhone devices.
2. Launch specialized version for iPhone 6 and iPhone 6 Plus. Considering the different hardware parameters, Tenorshare unveils [iPhone 6/6 Plus Data Recovery](#), optimizing file recovery rate.
3. Recover Viber call history and messages. Whenever you’ve lost call history, images, video and audio media messages in Viber, you can recover it instantly with the new version.
4. Fully new user interface (UI). Tenorshare UI designers took their time in an effort to resign the UI. The new UI is simpler and more intuitive to go with.

The other features of Tenorshare iPhone Data Recovery 6.0.0.0:

1. 16 types of iPhone files supported. Such as contacts, call history, messages, notes, photos, videos, recordings, calendar, bookmarks, etc.;
2. 3 recovery modes provided. Recovering data from iOS devices, restore file from iTunes backup, get back data from iCloud backup;
3. Preview photos, messages, notes, etc., before recovery.
