Through this new partnership, Thar Process is furthering their overall mission to design, develop and distribute top-tier quality equipment for the food and pharmaceutical communities, with a dedication and responsibility as an industry leader to help push the emerging market forward and set a higher standard – what Thar calls “Sustainable + Trust.”

YMC India proudly leads India in sales of bulk chromatography media and

industrial scale chromatography equipment to the world's largest pharmaceutical manufacturing market. YMC Co. Ltd., JAPAN is internationally reputed for its strong background in stationary phases / chromatographic media for the pharmaceutical industry while also selling preparative to process-scale normal and reverse phase liquid chromatography (LC) equipment.

While YMC India will continue to sell those systems, the Thar Process series of SuperFast CO<sub>2</sub> Extraction™ and Isolator SFC™ systems expands their reach into a new markets including the extraction Ayurvedic natural medicines, essential oils, flavors, fragrances; the purification of hemp and palm oil plus chiral separations and impurity remediation for pharmaceuticals.

The partnership between Thar Process and YMC India brings together knowledgeable and experienced engineering with the highest level of pharmaceutical industry-specific expertise to further advance the evolving technology and provide innovative products to the South Asian market.

### **About Thar Process**

Thar is committed to bringing innovation to the industry and providing a reliable source for all natural product oil extraction needs, providing clients the training and education to become a premium FDA registered, USDA Organic processor – like Thar in its Pittsburgh HQ.
