

The BellyBra – the original Maternity Support Tank with Back Support for Pregnant Women, now available online

DENVER, Colo., Oct. 7, 2013 (SEND2PRESS NEWSWIRE) – Well beyond what common maternity support belts provide, the BellyBra® by T & J Designs Inc., provides all-over maternity support and relief for your breasts, back and abdomen. Many women have commented on the “snug and safe” feeling the BellyBra maternity support belt provides with its gentle, always-there assistance. The maternity belly-band incorporated into the BellyBra is to fit snug and comfortable, not tight or binding.

The secret is in the back panel. It stretches in one direction, up and down. The non-constrictive, two-inch bottom band lifts weight off the pelvis, distributing weight equally between the shoulders. It makes sense that this helps to relieve back pressure and back pain! With the correct size, the BellyBra® will relieve the simple pains brought on by pregnancy.

Now the BellyBra® is available directly online, at the company’s own website, bellybra.com, as well as through the company’s Facebook Fan page. This allows pregnant women to directly shop for a variety of colors, as well as take advantage of coupons and discounts available. Linda Turner is the BellyBra® inventor and owner of T & J Designs Inc., the company that now distributes the BellyBra® all over the world.

“The BellyBra is a bra that actively supports a women’s belly throughout her pregnancy – it equally distributes weight between the shoulders, and is non constrictive,” said Linda Turner. “It lifts the weight off the pelvis and has no straps, hooks, or Velcro – giving a pregnant woman gentle, always-there, everyday support.”
