

Therapy Partner launches automated industry technology to assist clinicians with the mandatory Oct. 1, 2015, ICD-10 conversion

DENVER, Colo., Oct. 12, 2015 (SEND2PRESS NEWSWIRE) – Beginning October 1, 2015 all HIPAA Covered Entities must utilize ICD-10 Codes. Therapy Partner, the fastest growing practice management system for therapists, psychologists, and psychiatrists has just launched automated technology that easily converts all patient diagnostic codes from the former DSM-4/ICD-9, to the new required ICD-10.

Therapy Partner has also generated a free educational Industry Brief for all mental health practitioners to easily understand the conversion to ICD-10 codes; this brief also includes vital information for utilizing the DSM-5 single-axis diagnostic system.

DSM-5/ICD-10 Transition – What Does It All Mean?

The DSM-5 is a Subset of the larger ICD-10 which since 1980 began including all medical and psychological conditions. Beginning October 1, 2015 all HIPAA covered entities must transition from DSM-4/ICD-9 codes to DSM-5/ICD-10 codes.

Therapy Partner is Pioneering Technology & Education and has put together this free industry wide brief that helps walk clinicians through the conversion. The brief can be found online at <https://www.therapypartner.com/LandingPages/2015-ICD10ConversionInfo.asp>.

To Learn More About Therapy Partner's progressive technology suite or the October 1, 2015 Transition to ICD-10 Codes or The DSM-5 Single-Axis Coding System contact Therapy Partner.
