

Treadstone 71 Expands Groundbreaking Cyber Intelligence Services

HALF MOON BAY, Calif., Dec. 3, 2013 (SEND2PRESS NEWSWIRE) – Treadstone 71 announced today the expansion of its pioneering cyber intelligence services used to methodically and systematically collect, organize and analyze data. Treadstone 71 integrates, evaluates, and interprets information from all data sources delivering a range of opportunities and recommendations key to decision making.

The new services assist analysts to comprehend complicated and uncertain situations leading to comprehensive situational awareness while teaching analysts to be their own collectors. The program examines personalities and a cross-cut of various skills to answer questions immediately when possible, setting the stage for deeper analysis by default.

“Security is not intelligence. Nor is technical data cobbled together with today’s security tools,” said Jeff Bardin, Chief Intel Office for Treadstone 71. “Cyber Intelligence is what cyber security should be based upon. Unlike many in the marketplace today, our DNA is rooted in intelligence.”

Treadstone 71 uses a methodical process to examine information determining the nature, function, interrelationships, personalities, and intent regarding the client and target attack surfaces, and intelligence capabilities. From credibility and source reliability verification and validation to cyber elicitation, dry cleaning and ghost surveillance, Treadstone 71’s services cover the gamut of cyber intelligence capabilities.

Treadstone 71 systematically searches for and collects information, material, and socio-cultural information from fast fluxed locations analyzing data to answer information requirements, facilitate subsequent operations, or support criminal prosecution. Specialized methods tactics, techniques, and procedures are used in executing cyber intelligence activities to obscure, protect, or otherwise frustrate detection.

“We analyze fragmented and contradictory data in order to identify significant facts while drawing deductions,” said Bardin. “Treadstone uses structured analytic techniques that help overcome the cognitive problems that lead to intelligence failures. The approach helps guide us in how we conceive, format, produce, and disseminate intelligence reports to our clients. Treadstone delivers clear, concise, bottom-line-up-front reporting for time sensitive, actionable cyber intelligence.”

Treadstone 71’s cyber intelligence services provide clarity and persuasiveness in reporting that is oriented towards conclusions, focused on the future, and relative to client requirements.

About Treadstone 71 LLC:

Treadstone 71 (<https://www.treadstone71.com/>), founded in 2002, a woman and

veteran owned small business delivers cyber intelligence, counterintelligence, infiltration, clandestine cyber HUMINT, OSINT training and analysis, cyber psychological and target acquisition operations. For more information call (888) 714-0071 or email at intel@treadstone71.com.
