

# TunesKit Introduces New iPhone Data Recovery Which Can Rescue Any Lost iOS Data for You

GUANGDONG, China, Sept. 4, 2018 (SEND2PRESS NEWSWIRE) – TunesKit Software just officially launched its new product line with the flagship **iPhone Data Recovery**, aiming to help iOS users to easily and quickly recover any lost or deleted data on iPhone, iPad or iPod touch, including the latest iOS 12 beta and iOS 11.4.

Send2Press® Newswire

As one of the top-leading multimedia software providers in the world, TunesKit is now trying to expand its product line by unveiling a new iOS utility app, namely **TunesKit iPhone Data Recovery** that is specialized in rescuing over 20 types of lost data from almost all models of iPhone/iPad/iPod touch efficiently.

To be specific, TunesKit iPhone Data Recovery is able to recover photos, videos, messages, WhatsApp chats, Viber, Kik attachments, notes, contacts, reminders, Safari history, call history due to any data loss scenarios, such as accidental deletion, iOS upgrade error, jailbreak failure, virus attack, device stolen or damage, password lock, and more. No matter how you lost the

data on iOS devices, TunesKit iPhone Data Recovery can bring them back for you in an easy way.

In order to guarantee the highest recovery rate, TunesKit Data Recovery for iPhone provides 3 smart recovery modes for you, including "Recover from iDevice," "Recover from iTunes Backup," and "Recover from iCloud Backup."

You can choose the proper recovery method according to different data loss situations. And by recovering lost files on iPhone/iPad/iPod from iTunes or iCloud backup with TunesKit, you can selectively recover the specific files you want, instead of extracting the whole backup file which may cost much time especially when you have a large amount of files on iDevice.

Retrieving lost files from iOS devices with TunesKit iPhone Data Recovery only takes a few clicks thanks to its simple design. The whole recovery process could be completed in 3 easy steps: choose the recovery mode, select and scan the lost data type you need to recover, and then recover them back to computer. Even beginners can operate this app well without referring to user manual.

Additionally, TunesKit iPhone Data Recovery promises 100 percent secure recovery which won't record any of your account info or leak it anywhere else while recovering the missing files on your iPhone, iPad or iPod touch.

#### **TunesKit iPhone Data Recovery Key Features:**

- Support more than 20 lost file types on iOS devices
- Recover deleted data from iDevice, iTunes backup and iCloud backup
- Recover lost data due to different data loss cases
- Provide preview feature before recovery
- Fully compatible with the latest iOS and all iOS models
- Easy to use, 100 percent secure and fast.

#### **Price and Availability:**

TunesKit iPhone Data Recovery is available for all popular Mac and Windows platforms, including the latest macOS 10.13 and Windows 10. It's provided with free trial version so that you can test the data recovery performance before buying. But trial version only supports to preview the lost files. To recover them back, you should get the full version which costs from \$49.95 to \$359.95 based on different types of license. For more details, you can download the free trial version here to test it out.
