

# UBX Cloud becomes first U.S. based CSP to offer CMMC cloud enclaves

DETROIT, Mich., March 18, 2021 (SEND2PRESS NEWSWIRE) – UBX Cloud is the first U.S. based cloud services provider to offer Cybersecurity Maturity Model Certification (CMMC) cloud enclaves.

Send2Press® Newswire

The CMMC represents the Department of Defense's continued effort to protect Controlled Unclassified Information (CUI) in the defense supply chain. Building on the 110 controls set forth in NIST SP 800-171, the CMMC specifies 173 security practices across five maturity processes. Starting in fiscal year 2021, the department will pilot the implementation of CMMC requirements for Level 3 and below.

UBX Cloud now includes CMMC-compliant Virtual Desktop Infrastructure (VDI) cloud enclaves in their service offerings, as a way for suppliers and contractors to fast-track themselves into CMMC compliance. UBX Cloud promises full service at a flat rate and per user basis for an easy comprehensive package.

"Our company and our team is always focused on the simplest approach and

solution to things, and in this case with our CMMC enclaves there is no difference,” said Steve Panovski, UBX Cloud president. “UBX Cloud brings a tremendous amount of value to simplify the path to compliance while providing modern cloud solutions and simplifying IT complexity, or as just a bonus.”

UBX Cloud caters specifically to the IT MSPs and MSSPs market, as well as corporate IT and Chief Technology Officers, taking the complexity out of the CMMC process with flat rate assessment services and fast deployment. The all-in white label packages include Cybersecurity services, CMMC consultancy, and VMWare-powered cloud infrastructure to provide deeper discounts, and eliminates the need for any heavy upfront investment.

### **About UBX Cloud**

UBX Cloud is a Michigan-based cloud service provider with data centers in the United States, South America and India. Our services include Managed IT-as-a-Service, Private/Hybrid Cloud, Disaster Recovery, Cloud Workspaces, Veeam Cloud Backup, and a variety of custom IT consulting services. Our team of IT Engineers helps organizations of all kinds maintain uptime and ensure business continuity.
