

Utelogy Continues Building Technology Team with New Hire to Augment Support and Integration

LOS ANGELES, Calif., Nov. 22, 2016 (SEND2PRESS NEWSWIRE) – [Utelogy Corporation](#), creator of software for control and management of audiovisual systems for business and education, continues to hire as a result of growth and a desire to build a strong team of developers and technical experts.

Utelogy provides Software-Defined audiovisual (SDAV) technology for control management, analytics and services for smart classrooms, conference rooms and video-conference rooms.

Chatura Ahangama joins Utelogy Corporation where his duties will include responsibility for driver development and equipment integration. Ahangama will also work closely with Utelogy's Support Team to meet customer demand for drivers.

"Chatura brings to Utelogy both practical work experience and an impressive educational background," said Frank Pelkofer, CEO of Utelogy. "We are also delighted that Chatura was recruited by an employee as it reflects well on the company culture our team has created."

Ahangama holds degrees in Computer Engineering, Computer Systems Networking in Cyber Security, and most recently began work on a Bachelor's Degree in Computer Science in Software Engineering from California State University of Monterey Bay.

About Utelogy Corporation:

Started in 2009, Utelogy Corporation publishes an enterprise technology control and management platform without limits. Utelogy is a flexible, scalable software solution for control and management of AV systems that puts the power in the hands of the user.
