

ViewTech Borescopes Announces VJ-3 2.2-Millimeter Mechanical Articulating Video Borescope

TRAVERSE CITY, Mich., June 17, 2020 (SEND2PRESS NEWSWIRE) – As inspection areas decrease in size, ViewTech Borescopes insertion tube diameters must follow suit. The VJ-3 2.2-millimeter is the newest and smallest diameter inspection tool available from the industry-leading video borescope professionals at ViewTech. The VJ-3 2.2mm is utilized during many different types of inspection processes, including metal castings, small-scale components, circuitry and more ensuring that every part is up to spec.

The advertisement features a central image of the ViewTech VJ-3 2.2mm video borescope, a handheld device with a black body and an orange trigger. To the left is a vertical strip of five small images showing various industrial inspection scenarios: an oil pumpjack, a factory, an airplane, a car engine, and wind turbines. In the center is the ViewTech Borescopes logo, which consists of the word 'VIEW' in a stylized font above 'TECH' in a larger, bold font, with 'BORESCOPES' underneath. At the bottom of the advertisement, the website 'www.ViewTech.com' and the phone number '231.943.1171' are displayed.

Send2Press® Newswire

The VJ-3 2.2mm video borescope is available with an ultra-thin 2.2-millimeter insertion tube and length of 1.0 meter. ViewTech's newest video borescope features two-way, joystick-controlled articulation, a rugged, liquid-proof design, along with image and video capture capability. Nondestructive testing professionals are able to save time and money with the intuitive and portable VJ-3 2.2mm video borescope.

With ViewTech Borescopes now offering two different inspection tools with a diameter under 3.0mm, the smallest spaces are accessible with the VJ-3 2.2mm

and [VJ-3 2.8mm video borescope](#). When comparing the 2.2mm with the 2.8mm, both models offer similar features, however the 2.8mm features full four-way articulation, rather than the two-way articulation the 2.2mm is equipped with.

Send2Press® Newswire

In addition to the VJ-3 2.2mm, other recent video borescope product enhancements include the [VJ-3 Dual Camera](#), [VJ-3 Infrared \(IR\)](#), [VJ-3 Poly](#) and [VJ-3 Ultraviolet \(UV\)](#). With insertion tube diameters up to 6.0mm and lengths as long as 8.0 meters, many industries, including Aerospace, Energy, Medical, Automotive, along with Military and Defense, have a high-quality inspection tool at a price that is attainable for most balance sheets.

VJ-3 Video Borescope

The VJ-3 mechanical articulating video borescope is a nondestructive testing instrument used for the remote visual inspection of machinery, equipment and components. The VJ-3 facilitates the visual recording and photo documentation of an inspection and components in areas that are otherwise inaccessible or require great effort and expense to access directly. The VJ-3 consists of two modules integrated into one system: an insertion tube with distally mounted camera/LEDs, and the base unit with control panel, LCD monitor, power source and all necessary circuitry.

About ViewTech Borescopes

ViewTech Borescopes, founded as RF System Lab in 2008, is North America's #1 seller of video borescopes. Their first product, the VJ borescope, set a new standard for portability, ergonomics and ease-of-use, with its industry-first mechanical, joystick-controlled articulation.
