

# Willow.ai™ and TECVINE Offer the Next Generation of AI

GRAND JUNCTION, Colo., Sept. 29, 2020 (SEND2PRESS NEWSWIRE) – Willow.ai, provider of a proprietary pre-trained artificial intelligence solution called Willow™ that analyzes insights, automates workflows, and optimizes everyday business tasks, announces today its new partnership with TECVINE, a leading provider of network, cloud, and mobility infrastructure solutions for enterprise organizations.

Send2Press® Newswire

Today's announcement enhances Willow.ai's current renowned intelligent self-learning solutions by putting it into the hands of a prominent integration partner that specializes in advanced technologies that solve complex business issues at scale.

Allen Wills, CEO, TECVINE says, "It is mission critical for enterprise companies to cost-effectively utilize AI to drive immediate revenues, eliminate organizational costs, and improve upon their competitive advantages and this new partnership allows them to do just that and more."

The Willow.ai and TECVINE alliance will focus on offering organizations a

seamless solution that includes advanced AI, infrastructure technologies, and complete system integration. “We are very excited to partner with TECVINE,” says Brian Kennedy, CEO, Willow.ai, “this partnership builds on each organization’s successes. Combining our AI, Willow, with the turnkey integration solution that TECVINE provides is a natural fit and second to none. This partnership will extend our shared success to our respective markets as well as new ones.”
