

Wondershare Releases Photo Recovery Free Software that Works Great to Recover Other Types of Data as Well

SHENZHEN, China, Jan. 17, 2019 (SEND2PRESS NEWSWIRE) – For people who can't seem to locate the panoramic vistas captured on their last exotic vacation, have no fear because Wondershare's photo recovery software can help! In this technology driven era, capturing and storing high quality photos of scenic locations or family reunions is easy on Mac and other operating systems and devices. But these devices aren't foolproof, and do tend to turn corrupt at times resulting in data loss, and in worse cases deletion of all the albums on Mac computers.

What's impressive about Recoverit is that it not only supports myriad scanning algorithms, but also all types of major data files, so regardless of the type of file that's lost, it can help restore them. Furthermore, this data recovery free download software can help recover lost or deleted files via eight different recovery modes including files deleted from the Recycling Bin with Recycle Bin Recovery and files deleted as a result of lost partition with Lost Partition Recovery.

Deleted photo recovery is not the only area where Recoverit excels, but can be used as a [data recovery software for pc](#) free download solution to ensure that your data is well protected. Apart from hard drive crashes, there are several ways in which data can be lost on a PC including accidentally pressing Shift + Delete on an important PowerPoint presentation, virus, Spyware or Trojan attacks, or intentionally deleting files that were presumably unimportant at the time.

For Mac users, the [free data recovery Mac version](#) of Recoverit can help to effectively, safely and completely retrieve lost data regardless of how it was lost whether a formatted hard drive or system crash. Adding to this, Recoverit data rescue Mac free software boasts a significantly high success rate, and supports several Mac operating system versions including macOS 10.13, macOS 10.12, OS X 10.11, 10.10, 10.9, 10.8, 10.7 and 10.6.
