World’s Only Music Transfer Freeware: Don’t Miss KiwiGeeker’s Groundbreaking KiwiG PhonTunes

HONG KONG and NEW YORK, Jan. 27, 2014 (SEND2PRESS NEWSWIRE) — KiwiG PhonTunes is the must-try free music transfer application launched this week by data specialist software and integrated data solution provider KiwiGeeker. Overcoming many of the greatest music transfer challenges, KiwiG PhonTunes enables users to transfer any music between multiple devices free-of-charge and without fear of file overwriting. This software is absolutely indispensable to any true music lover.

“We know our users have endured the headaches of music transfer barriers-restricting sharing of music purchased both on and off iTunes, overwriting full playlists and libraries with simple device syncs, etc. — and we want to give them free reign of their music experience, for free,” says Beank Tong, the managing director of KiwiGeeker. “Enough hassle, just enjoy your music anywhere, anytime.”

KiwiGeeker brings this software to its users from a foundation of over 10 years of professional experience in data security, data backup, and data recovery. This deep understanding of data flow and structure has made KiwiG PhonTunes’ outstanding performance possible, intimately and flexibly creating channels between mobile devices (Android and iOS), and PCs (including iTunes tracks and internally stored music files on the hard disk) for pain-free music transfer.

Downloadable for Windows OS today, KiwiG PhonTunes allows users to migrate music files, with accompanying metrics such as ratings and number of plays, in large or small quantities as many times as desired. PhonTunes’ intuitive library display window additionally notifies users of duplicates across devices, and features functions for playlist creation and management on-screen. Say goodbye to clunky shuffling of tracks with pre-installed software, and say hello to the future of music management and sharing.
